EDUCATION

PhD in Aerospace and Ocean Engineering Department (Aug. 2011- Jul. 2016)

Virginia Polytechnic Institute and State University, Blacksburg, USA; GPA: 3.85/4.00

Bachelor of Technology and Master of Technology in Aerospace Engineering (Jul. 2004 – Jun. 2009)

Indian Institute of Technology (IIT) Bombay, Mumbai, India

Specialization: Aerospace Structures; GPA: 9.42 / 10.0

INDUSTRIAL EXPERIENCE

Airbus Engineering Centre, Bangalore, India (Apr. 2010 – May 2011)

Associate Engineer in Loads and Aeroelasticity Team

- Estimated loads on aircraft during various manoeuvres for aircraft design certification.
- Accelerated completion of projects related to flight mechanics, aeroelasticity and structural analysis with shell scripting.

MSC Software (Symphony Technology Group), Pune, India (Jul. 2009 – Mar. 2010)

Senior Application Engineer in Verification and Validation (V&V) Team

- Involved in V&V of new developments in the finite element solver NASTRAN® related to statics, frequency response, non-linear analysis, aeroelasticity.

Department of Statistics, University of Klagenfurt, Klagenfurt, Austria (May 2007 – Jul. 2007)

Intern for the project ‘Spatial prediction using Bayesian Trans-gaussian Kriging’

- Optimized a MATLAB® program used for spatial prediction of an event using Kriging techniques.

RESEARCH EXPERIENCE

Non-intrusive Continuum Sensitivity Analysis for Aeroelastic Shape Optimization (Ph.D. Thesis)

Advisor: Dr. Robert A. Canfield, Aerospace and Ocean Engineering, Virginia Tech (Nov. 2012 – present)

- Investigating methods of implementing (analytic) Continuum Sensitivity Analysis.
- Formulating a non-intrusive (or black-box) method of sensitivity analysis for shape optimization, which is **more accurate and less computationally expensive** than some of the current methods.
- Extending the non-intrusive method for nonlinear aeroelasticity applications.
- Developed an adjoint formulation of CSA to account for large number of design variables.

Aerodynamic Modeling of Flapping Wing Micro-Air-Vehicles (MAVs)

Advisor: Dr. Mayuresh J. Patil, Aerospace and Ocean Engineering, Virginia Tech (Aug. 2011 – Oct. 2012)

- Developed a **reduced order aerodynamic model** for unsteady aerodynamics of flapping flight based on Unsteady Vortex Lattice Method (UVLM) and Momentum Disc Theory.
- Demonstrated that this model is more accurate than quasi-steady models and could be used for **conceptual MAV design**.

Active Vibration Control of Aircraft Structure using Piezo-ceramic Stack Actuators (Masters Thesis)

Advisor: Prof. Prasanna M. Mujumdar, Aerospace Engineering, IIT Bombay (May 2008 – Jun. 2009)

- Experimentally demonstrated **active vibration control** of wing box of a typical fighter aircraft by designing optimal control law and implementing it using state-of-the-art data acquisition system.

- Performed simulations and experiments to establish use of **Piezo-ceramic stacks** for vibration control.
- Acquired expertise in data acquisition, signal processing, and frequency response experimentation techniques.

Stress Wave Attenuation during Ballistic Impact on a Ceramic Target

(Jul. 2006 – Mar. 2008)

Advisor: Prof. Niranjan K. Naik, Aerospace Engineering, IIT Bombay

- Numerically and experimentally demonstrated **attenuation of stress waves** due to ballistic impact on ceramic tiles for possible applications in design of armors and military vehicles.
- Proposed the **novel concept of stress wave attenuation coefficient** for ceramics tiles.

Effect of Back Pressure on Impact Characteristics of Composites

(May 2006 – Aug. 2006)

Advisor: Prof. Niranjan K. Naik, Aerospace Engineering, IIT Bombay

- Designed and fabricated equipment for pressurizing glass-fiber composite specimens.
- Experimentally investigated the effect of **low-velocity-impact** on pressurized composite vessels.

AWARDS AND ACHIEVEMENTS

- Awarded **Pratt Fellowship** based on outstanding performance as a graduate student, for the academic year 2014-2015.
- Awarded ‘**Dr. Shankar Dayal Sharma Gold Medal**’ for being the most outstanding student in general proficiency, excellence in academic performance, extra-curricular activities and social services among all 1600 degree recipients of IIT Bombay in the year 2009.
- Awarded **Institute Silver Medal** and **Boeing Scholar Award** for standing 1st among Dual Degree (B.Tech, M.Tech) students of Aerospace Engineering Department, IIT Bombay in the year 2009.
- Won 6th place in 2nd **International Cold Formed Steel Student Design Competition** in 2012.
- **Finalist in AIAA 2015 Student Competition**: Qualified for the final round of student competition at AIAA Multidisciplinary Analysis and Optimization Conference, Jun. 2015.
- **Best paper presentation**: Won the first prize for the project on ‘Composites Structures’ in national level students’ paper presentation competition at ‘Zephyr 2006’, Aerospace Engg. Association, IIT Bombay.
- **Winter Academy 2007**: One of the seven students to represent IIT Bombay at the annual Indo-German students meeting at Guwahati, India; Presented a talk on ‘Finite Element Analysis of Dynamic Systems’.

SKILLS

- **Technical specialties**: Mathematical modeling, Optimization, Computation methods for structural and fluid analysis, Solid mechanics, Fluid mechanics, Experimental testing of ceramics and composite materials.
- **Software**:
Structural Analysis: NASTRAN, PATRAN, ABAQUS, ANSYS
Fluid Analysis: FLUENT, ZEUS, ZAERO, OpenFOAM, SU2
Other: MATLAB, SIMULINK, LabVIEW, SOLIDWORKS, AUTOCAD, MATHEMATICA
- **Programing Languages**: C, C++, Fortran, Python, MATLAB, Shell scripting

EXTRA-CURRICULAR ACTIVITIES: Involved in amateur HAM radio (US Technician License – KK4SXXZ), amateur astronomy, paper aero-modeling, hiking and biking.
